Introduction

The following four appendices contain a sample of the communications we received from the public during the August 15 to November 15, 2011, comment period on the Draft Revised Comprehensive Conservation Plan and Draft Environmental Impact Statement for Arctic National Wildlife Refuge.

Appendix A: Contains a single copy of each of the form letters we received regardless of whether they included comments that were identified as requiring a response from the Service.

Appendix B: Contains communications from governments, agencies, and tribes. Communications in this appendix include at least one comment requiring a response from the Service.

Appendix C: Contains communications from non-government organizations. Communications in this appendix include at least one comment requiring a response from the Service.

Appendix D: Includes those communications from individuals and other sources that contained five or more comments requiring a response from the Service.

In appendices B, C, and D, comments that needed to be addressed by the Service are highlighted in light or dark yellow. Preambles (text preceding a comment that provides context or important information pertaining to the comment) are highlighted in blue. We also provide the comment identification number assigned to each communication during the comment analysis, and the topic and subtopic to which each comment was assigned.

For privacy protection, we redacted form letters to show only their content and not the personal information of the individual(s) who submitted them. In Appendix D, personal information (such as names and addresses) was retained unless someone specifically requested confidentiality. E-mail addresses and phone numbers were redacted for all individuals in Appendix D.
